

SIMPLEX PRODUCT BULLETIN

TJHA SERIES TOE JACKS

Introduction

Simplex is proud to introduce the all new TJHA series Toe Jacks. We have updated our line of Toe Jacks in order to maintain and uphold a strong focus on quality, durability, and reliability. This change will help us ensure more reliable collaboration with our suppliers, increase ease of acquiring service parts, and improve on-time delivery of inventory. There are specification differences between the old and new lines of Toe Jacks; see the differences in the tables below. We will now be able to offer complete repair kits and improved service for our distributors.

Old Specifications

<i>Old Model</i>	Capacity (tons)	Stroke (in)	Minimum Height (in)		Base Area (in)	Maximum Handle Effort (lbs)	Method Of Return	Weight (lbs)
